

SANZHAR KUATOV

Bachelor of Software Engineering (Hons) · Sunway University × Lancaster University
sanzarkuatov@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

Second-year Software Engineering student at Sunway University (GPA 3.7, Dean's List every semester) with internship experience delivering 4 production systems and a portfolio of AI-powered tools. Skilled in Python, Node.js, and LLM integration, with hands-on experience building full-stack platforms, Telegram bots, and automation pipelines.

EXPERIENCE

Software Engineering Intern Oct 2023 – Dec 2023
Galanz Bottlers · Kazakhstan

- Built an automated birthday card generator (Python, PIL, SMTP) that sent personalized cards to 10+ departments daily, saving HR 30+ minutes of manual work each day; 30+ cards sent
- Developed an Employee Info Telegram Bot for instant on-demand employee record retrieval, replacing a slow manual search process
- Built an IT Helpdesk Telegram Bot to extend the internal helpdesk beyond a single office, enabling staff to raise IT requests from anywhere
- Created an HR Information Website where staff from all departments can self-serve HR policies and information

Freelance Web Developer 2023 – 2024
Independent · Kazakhstan

- Designed and delivered custom websites with AI-integrated features for clients, managing projects independently from requirements to deployment

PROJECTS

AI-Powered Expense Tracker Bot · [GitHub](#)
Python · Telegram API · Anthropic Claude API · MySQL

- Built a Telegram bot using Claude AI to record and categorize expenses across 9 categories (Food, Transport, Health, Entertainment, etc.) with individual user accounts stored in MySQL
- Users can generate a detailed spending report for any custom date range using a simple from/to date format

AI Growth Coach Platform · [Live Demo](#)
Node.js · PHP · HTML/CSS · MySQL · Razorpay API

- Full-stack platform where users log goals, habits, tasks, and roadmaps; AI coach reflects on failed goals and generates personalized roadmaps based on the user's habits
- Grew from 10–20 early users to 100+ active users; integrated Razorpay for recurring subscription payments

Discord Member Verifier · [GitHub](#)
Python · Google Sheets API · Discord Bot

- Members run verify {student_id} on joining; bot cross-checks the student ID and Discord ID against a Google Sheets registry and auto-grants access — verified 50+ Sunway Game Development Club members

Automated Birthday Card Sender · [GitHub](#)
Python · Flask · REST API · SMTP · PIL

- Generates personalized birthday card images (PIL) and auto-distributes them via email to all departments daily; deployed at Galanz Bottlers — 30+ cards sent, 10+ departments, fully unattended

SKILLS

Languages: Python, JavaScript (Node.js), TypeScript, C# (.NET), PHP, HTML/CSS
AI & APIs: Anthropic Claude API, LLM Integration, Telegram API, Google Sheets API, Discord API, REST APIs, Razorpay API
Backend / DB: Flask, Node.js, Microservices · MySQL, PostgreSQL, SQLite
Tools: Git

EDUCATION

Bachelor of Software Engineering (Hons) Sep 2024 – Aug 2027
Sunway University × Lancaster University · Dual Degree
GPA: 3.7 / 4.0 · Dean's List — Every Semester
